Abdullah,

As discussed with you earlier several times regarding updating the décor of our office to improve video representation of office. We have several ideas, but here we are listing few of them

- 1- Office is in dire need of improving the reception area. We need a reception desk and some good lighting over there
- 2- Few updatation of Main Floor, with a big wooden Servixer Logo with backdrop light in background.
- 3- A backdrop somewhere in Floor, where we can shoot portrait or event images.
- 4- Dev Studio Logo outside office and few stickers inside (we can do this on our own)
- 5- Updatation of HR room. Need to hide outer wiring and some some minor updatation

We can talk this in detail with Admin department as well
